

How to Fit the Shoe Tags

In addition to your race number, you will be given a matching numbered envelope which contains a shoe tag, to fasten to the top of the shoe, and two twist ties.

Thread the twist ties under and up through the laces, then pass the ties upwards through the holes in the tags and twist together.

At the end of the race, these will be cut off, so **DON'T THREAD YOUR LACES THROUGH THE TAGS**, only use the twist ties!! Threading laces through the tags can also damage the tag.

If you fail to attach the tag to your shoe then your time won't be recorded by the equipment.

Once the tag is in place, your time will be recorded each time you cross the mats, at both start and finish. Your first time seen by the equipment will be used to calculate your overall gun and nett times.
